

Pole Vault Measuring Device 2012

AE205

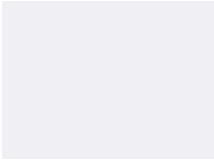

The pole vault measuring device is telescopic for easy handling and storage.

Made of aluminum. It has an integrated bubble level. A readout allows for the reading of the measuring tape that indicates the height at which the crossbar is located. The measurement can be taken from the upper and lower part of the measuring plate.

The maximum measuring height is 8 meters.

The product is supplied in a bag for easy transport and storage.
