

General Transport Trolley

AV120 - AV125

The general transport trolley consists of a metal structure that supports an MDF board.

It is provided with 4 nylon wheels which facilitate its movement. The rear wheels are fixed, the front wheels are connected to the steering mechanism.

All metal elements such as bolts, shafts, etc. are zinc-coated.

After a degreasing treatment, consisting of a pressured phosphate bath, the structure is painted with polyester powder paint and polymerized at 200° C in an oven.
