

Set of two Mondoleague volleyball posts

PY050

Set of two telescoping volleyball posts for high indoor competition, made of steel profile of 90 mm in diameter.

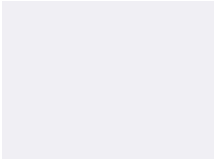

The posts include protections which can be easily assembled and disassembled by a Velcro strap, and are covered for height adjustment systems, tensioning and securing of the net that could be dangerous if hit against by a player.

The posts have a system of regulation voltage and high powered single removable crank.

At the top of each post is housed a grooved wheel through which circulates the net cable.

The bottom portion of the posts have rounded end that covers the PVC edges which may be hazardous in handling for assembly and disassembly.
