

Set of supports for shotclock scoreboards on MONDOHANGER

PK590

The set comprises 2 supports for shotclock scoreboards, that must be located over the backboard and fixed to the vertical structure of the basketball unit (hung from the ceiling).

The support is made completely of steel profile. It contains two vertical posts to which the scoreboard is fixed and that are joined together with bars.

At the same time, the support is completely fixed to the vertical structure of the MONDOHANGER basketball unit, and it does not interfere in any way with folding or unfolding operations.

The scoreboard is fixed to the structure with screws that go through the steel posts and into the scoreboard external case using riveting nuts.

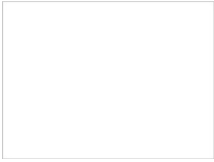

The product is painted with polyester powder paint, which is applied after a degreasing treatment using a pressurized phosphate bath and cured in an oven at 200°C.

Standard colour: white
