

Fiberglass board for basketball

PK850

Unit of fiberglass basketball board designed and manufactured in compliance with European Standard EN-1270, to be used as a spare part.

The board is manufactured in basketball dimensions of 1.800 x 1.050 mm

The board is made of a 20 mm thick fiberglass covered with polyester resin and painted in white. It is protected against outdoor weather conditions.

The fiberglass backboard must be joined to the metallic frame (not included) with screws incorporated in the fiberglass. As a result, they are not visible from the front side.

The black bands of the board are painted to meet the basketball regulations.
