

# Steel Tube Support Platform for Pole Vault Landing Area

## AE633 - AE636

Support platform consisting of various modules that can be combined to each other. The modules, made of steel profile of rectangular section, are mounted on vertical supports equipped with large footings to preserve the track surface from point load.

The platform is equipped with lateral bars that hold the landing area into position. It is properly recessed to allow room for the standards and for the vault box. The front part is equipped with a protection to prevent the vaulting pole from entering and being trapped under the platform.

After a degreasing treatment, consisting of a pressured phosphate bath, the product is painted with polyester powder paint and polymerized at 200°C in an oven.

Note: The product is supplied disassembled.
