

Set of two metal containers for counterweight

PY003

Set of two counterweights boxes made entirely of steel. They are designed to contain the counterweight needed when using portable MONDO posts. They are compatible with the following references:

- Tennis: PT110, PT010
- Paddle: PL010, PL110
- Volleyball: PY002

The game consists of 2 units, one box for each post.

Each drawer has handles on each side for easy transport.

The box should be filled with a material heavy enough to avoid overturning of the posts during the game.

In addition MONDO recommends to anchor the posts to the ground with any appropriate fixing system, apart from using the counterweight boxes.

The product is painted with polyester powder paint, which is applied after a degreasing treatment using a pressurized phosphate bath and cured in an oven at 200°C.

Standard colour: blue
