

## Lane Marker Box WS

AC125 - AC127

Made of fiberglass-reinforced polyester. Perfectly stackable.

The surface is perfectly smooth with the color built into the material throughout the thickness of the product in order to reduce maintenance. A reinforcement strip along the lower perimeter gives rigidity and stability to the product.

The top of the box is equipped with holes that facilitate transport and allow the introduction of the false start and disqualification indicators.

The numbering is made with stickers applied to each of the three sides of the box.
