

Discus Cart WS

AL205

The frame of the cart is made from 30 mm diameter cold rolled steel tubes.

It is equipped with two 150 mm swivelling rear wheels and with two 200 mm fixed front wheels, with smooth coloured rubber tread, allowing for the movement of the cart in all directions.

A handle is provided for easy transport.

Discuses are placed within a structure consisting of multiple rings ensuring their arrangement and stability.

It can hold up to 20 pieces.

All tube ends are sealed with plastic pressure caps.

After a degreasing treatment, consisting of a pressured phosphate bath, the structure is painted with polyester powder paint and polymerized at 200° C in an oven.
